

## Subsection 5.2 — Core Security Principles

# Layered Defense Planning Matrix

Layered Defense Matrix

Layer	Purpose	Examples	Assigned To	Notes
Deterrence	Reduce target value	Lighting, locks, concealment		
Detection	Spot threats early	Noise discipline, watch rotation		
Delay	Slow intrusion	Barriers, chokepoints		
Defense	Last-resort action	Escape routes, alarms		

### Guiding Rule

Security fails where it depends on a single barrier—strength comes from depth.
